PROFESSIONAL SUMMARY

Full-stack Software Developer with 2+ years of experience building scalable web applications using Java, Spring Boot, React.js, Node.js, and SQL databases. Experienced delivering production features, REST APIs, authentication systems, and cloud-based deployments through Agile teams. Passionate about AI-assisted development and building practical automation tools. Seeking Software Engineer or Full Stack Developer opportunities across Canada.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, Java, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Bootstrap, Tailwind CSS, jQuery, Responsive Design

Backend: Node.js, Express.js, Spring Boot, Django, REST APIs, GraphQL, JWT, RBAC

Databases: PostgreSQL, MySQL, MongoDB, SQLite, PL/SQL

Cloud & DevOps: Docker, Kubernetes, Nginx, AWS (EC2, S3), Azure DevOps, GitHub Actions, CI/CD

Testing: Jest, JUnit, Supertest, Postman, Swagger/OpenAPI

Tools & Methods: Git, GitHub, JIRA, VS Code, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full Stack Developer — Contract

Sept 2025 - Feb 2026

Dodge Data & Analytics | Remote, CA

- Worked on Blue Book, a live commercial construction platform that connects contractors and suppliers across the US, maintained as part of Dodge Construction Network.
- Fixed bugs and added features across the stack: Angular and jQuery on the front end, Java and Node.js on the back end, in a codebase built and maintained by a larger team.
- Wrote MySQL queries and handled data logic for platform features including contractor profiles and bid management.
- Worked remotely with senior developers in Agile sprints on AWS-hosted infrastructure, using Git for version control throughout.

Software Developer — Co-op

Apr 2025 - Sep 2025

SilverThread Solutions | Toronto, ON

- Owned full-stack development of Skyward Travels, a travel-booking platform with flight and hotel search, a simulated payment flow, and a tiered loyalty points system, built with React.js, Node.js, and Java Spring Boot.
- Designed REST APIs across MongoDB, MySQL, and PL/SQL depending on the client, delivering a working prototype every two-week sprint.
- Presented sprint demos to stakeholders, gathered feedback, and incorporated changes into subsequent development iterations.

Junior Software Developer

Jan 2023 - Dec 2023

The Logic Factory

Ahmedabad, India

- Automated supply chain scheduling workflows using Delmia Quintiq and the Quill language, reducing manual scheduling effort by approximately 30%, while developing test harnesses to validate scheduling logic, identify edge cases, and detect defects before deployment.
- Collaborated with senior developers and business analysts to translate complex supply chain scheduling requirements into functional specifications and algorithmic solutions, contributing to reliable, scalable scheduling systems in an Agile development environment.

PROJECTS

JobPilot — AI-Powered Job Application Assistant | [GitHub](#)

- Built a Chrome extension that uses the Claude Haiku API to tailor resumes and generate cover letters for job postings on Indeed, replacing manual copy-and-customize work for each application.
- Worked around Manifest V3's service worker limits with long-lived port connections, and added client-side PDF generation and EmailJS notifications so the whole workflow runs without a backend server.

FoodDelivery — Real-Time Food Delivery Platform | [GitHub](#)

- Built an order management and live tracking system with JWT-based authentication and role-based access control.
- Containerized the app with Docker and Kubernetes and set up a Travis CI/CD pipeline, cutting deployment time by roughly 40%.

Quiz Platform — Multi-User Django Application | [GitHub](#)

- Built a multi-user quiz platform with concurrent participation support, optimizing Django ORM queries and PostgreSQL schema design to keep response times steady under load.

TEF Speaking Practice Coach — AI Oral Exam Trainer | [GitHub](#)

- Built a full-stack AI tool to practice for the TEF French oral exam, using Groq's Whisper API to transcribe spoken responses and Llama 3.3 70B to score grammar, vocabulary, and task adequacy against real exam criteria.
- Built React frontend with browser-based audio recording and an Express backend proxying Groq API calls, plus localStorage-based session tracking with a progress chart across practice attempts.

EDUCATION

Postgraduate Diploma — Full Stack Software Development Jan 2024 - Nov 2025

Lambton College | Toronto, ON (GPA: 3.6 / 4.0)

Bachelor of Engineering — Computer Science

June 2020 - June 2023

Gujarat Technological University | Ahmedabad, India

CERTIFICATIONS & EXTRACURRICULAR

Certification: Introduction to Agentic Automation

- 500+ problems solved across LeetCode (Top 10%), CodeChef (3★), and Codeforces (1200+ rating); Algorithm Mentor & Bootcamp Organizer, GDSC Lambton College (2024–2025), mentoring peers and running full-stack coding bootcamps.
